

Career Objective

Computer Science and Engineering student with a strong interest in software development and problem-solving. Currently building practical skills in programming, web development, databases, cloud computing and emerging technologies through academic projects, internships and continuous learning. Interested in developing real-world solutions and growing as a software professional.

Education

Sasurie College of Engineering , Tirupur

Sep 2024 - May 2028

B. E. in Computer Science and Engineering

CGPA: 7.5

Kongu Vellalar Matriculation Higher Secondary School,
Chennimalai, Erode

June 2023- April 2024

75.8 Percentage

Komarappa Sengunthar Girls High School, Chennimalai, Erode

June 2021 - April 2022

77.4 Percentage

SSLC

Skills Set

Programming Languages:C, Java, Python

Web Technologies:HTML, CSS, JavaScript

Database:MySQL, SQL

Tools & Technologies:Git, GitHub, VS Code, Figma, Canva

Core Skills:Data Structures and Algorithms, UI/UX Design, Basic Data Analysis

Internships / In-Plant training

Intern title 1 (UI/UX Designing)

Erode, India

UI/UX Design Intern – KIOTECH, Erode

December 2025

- Assisted in designing user-friendly interfaces for web and mobile applications.*
- Collaborated with the design team on real-time projects.*
- Applied UI/UX principles to improve user experience.*

Project

Mission SHAKTHI – AI-Powered Women’s Safety & Emergency Response System

Technologies: HTML, CSS, JavaScript, Python Flask, MySQL, Geolocation API, Google Maps API

- Developed a women's safety platform focused on rapid emergency response and location-based assistance.
- Implemented features including one-tap SOS, emergency contact management, and live location sharing.
- Integrated Geolocation and Google Maps APIs for location-based emergency services.
- Designed a responsive and user-friendly interface for quick access during emergency situations.
- Added support for identifying nearby emergency resources such as police stations and hospitals.

Status: Ongoing

AgriValue AI – Smart Post-Harvest Decision Platform

Technologies: Artificial Intelligence, Web Technologies, Agriculture

- Developed a prototype for AI-assisted post-harvest decision-making in agriculture.
- Analyzes produce quality, quantity, harvest age, market price, shelf life, and spoilage risk.
- Recommends suitable post-harvest actions such as SELL, STORE, PROCESS, or RECOVER.
- Designed to help farmers reduce post-harvest losses and improve the economic value of agricultural produce.
- Developed as a solution for the Smart India Hackathon 2026 problem statement.

Status: Prototype / Ongoing

Achievements & Certifications

Co-curricular

- Served as **Overall Coordinator** for the SRISHTA event.
- Participated in **UI/UX Design Workshop**.
- Participated in college technical events.
- Supported team coordination and event activities.
- Continuously developing technical and problem-solving skills through online learning and practical projects.

Certifications

- **AWS Academy** – Cloud Architecting
- **Fundamentals of Information Security** – Infosys Springboard
- **Introduction to Cloud Computing** – Infosys Springboard
- **Python** – Great Learning
- **Introduction to SQL** – Simplilearn
- **AI for Beginners** – HP LIFE
